Click [Add Cloud Provider Metadata-Based Criteria](#)

Next, click the dropdown to select the cloud provider.

The screenshot shows the 'Create Asset Purge Rule' interface in the Qualys Cloud Platform. The left sidebar indicates the current step is '2/4 Asset Scope'. The main content area is titled 'Asset Scope' and includes a sub-header 'Add criteria to select assets you want to add to the purge scope'. A section titled 'Add Cloud Provider Metadata-Based Criteria' is highlighted, with a dropdown menu for 'Select the provider' open, showing a list of cloud providers. Below this, there are fields for 'Assets that match all the following conditions:', including 'Select the attributes', 'Select the Operator', and 'Select the value'. A checkbox at the bottom allows for removing the cloud agent and associated license.
